

Math 8

Module 1 Blackline Masters

This blackline master package, which includes all section assignments, as well as selected worksheets, activities, and other materials for teachers to make their own overhead transparencies or photocopies, is designed to accompany Open School BC's Math 8 course. BC teachers, instructional designers, graphic artists, and multimedia experts developed the course and blackline masters .

Please note that the right to reproduce materials from the Math 8 Blackline Masters is restricted to the individual purchaser. Teachers may reproduce solely for use with their own classes.

The Math 8 course consists of four modules, the Math 8 Website and the Math 8 Media CD. Math 8 is available in both print and online versions.. All are available from Open School BC.

Mathematics 8

Module 1

Section 1 Nets and Views

Lesson A: Visualizing in Three Dimensions

Lesson B: Prisms and Cylinders and their Nets

Lesson C: Top View, Side View, and Front View

Section Assignment 1.1

Section 2 Calculations in 2-D and 3-D

Lesson A: Total Area of the Net

Lesson B: More about Area in 2-D and 3-D

Lesson C: The Amount of Space

Section Assignment 1.2

Section 3 Shapes and Design

Lesson A: What is a Tessellation Anyway?

Lesson B: Transformations in Tessellations

Lesson C: Creating a Tessellation

Section Assignment 1.3

Module 1 Test or Project

Module 2

Section 1 Multiplying and Dividing Integers

Lesson A: Should I Multiply or Divide?

Lesson B: Mult. and Div. with Negative Numbers

Lesson C: Expressions—More than one Operation

Section Assignment 2.1

Section 2 Squares and Square Roots

Lesson A: Perfect Squares

Lesson B: Square Roots of Perfect Squares

Lesson C: Estimating Square Roots

Lesson D: Calculating Square Roots

Section Assignment 2.2

Section 3 The Pythagorean Theorem

Lesson A: The Pythagorean Theorem

Lesson B: Pythagorean Triples

Lesson C: Using the Pythagorean Theorem

Section Assignment 2.3

Module 2 Test or Project

Module 3

Section 1 Analyzing statistical graphs

Lesson A: Types of Graphs and Data

Lesson B: Adv. and Dis. of Graph Types

Lesson C: Misleading Graphs

Section Assignment 3.1

Section 2 Graphing on the Coordinate Plane

Lesson A: Ordered Pairs and Linear Equations

Lesson B: Tables of Values

Lesson C: Relationships and Missing Values

Section Assignment 3.2

Section 3 Linear Equations

Lesson A: Algebra Tiles

Lesson B: Solving Linear Equations Symbolically

Lesson C: More Linear Equations

Section Assignment 3.3

Module 3 Test or Project

Module 4

Section 1 Multiplying and Dividing Fractions

Lesson A: Proper, Improper Fractions, Mixed Numbers

Lesson B: Multiplying Fractions

Lesson C: Dividing Fractions

Lesson D: Estimating and Solving Problems

Section Assignment 4.1

Section 2 Ratios, Rates and Percents

Lesson A: Ratios and Rates in Everyday Life

Lesson B: Making Sense of Percents

Lesson C: Solving Problems with Percents

Section Assignment 4.2

Section 3 Probability

Lesson A: The Probability of Independent Events

Lesson B: Problem Solving with Probability

Section Assignment 4.3

Module 4 Test or Project

Lesson 1.1C Try It!
Activity 2

3. Draw all of the following views of this house on graph paper.

- top view
- front view
- side view

Include windows and doors in your different views.

Section Assignment 1.1 Part 1:
Multiple Choice and Short Answer

1. How many cubes are there in the stack? (2 marks)

- 26
- 27
- 28
- 29

2. Which is the side view of the stack in question 2? (2 marks)

3. Which of these nets will not form a rectangular prism? (2 marks)

4. A cylinder has a diameter of 12 cm and a height of 4 cm. The net for this cylinder is drawn. Fill in the blanks. (8 marks)

- length of AB _____
 - length of CD _____
 - length of CF _____
 - length of JH _____
5. You are holding a circle and a sphere. Which is the 2-D shape, and which is the 3-D shape? Explain your answer. (2 marks)

6. On isometric dot paper, sketch the 3-D structure that would have the following net. (5 marks)

7. From these views sketch the 3D shape. (5 marks)

Section Assignment 1.1 Part 2: Design a 3-D Structure

Design a 3-D structure.

For example, you could design a skateboard ramp, tree fort, or bird house.

Your 3-D structure should contain both a rectangular prism and a triangular prism.

1. On isometric dot paper, draw your structure in 3-D.
2. On graph paper, draw the three views (top, front, and side) of your structure and include measurements.
3. Create the net of your 3-D structure.
4. Add design, colour, and detail to the net.

In your assignment:

- the net should build into your 3-D shape
- the 3-D shape should match your isometric drawing
- include titles for each of your drawings
- use a ruler for all straight lines
- use a pen or marker to go over all lines or use a computer to do the drawings

The following rubric will be used to mark your assignment:

Unsatisfactory	Satisfactory	Good	Excellent
Instructions followed (8 marks)			
Many instructions not followed 0–3	Some instructions followed 4	Most instructions followed 5–6	All instructions followed 7–8
Visual presentation (4 marks)			
<ul style="list-style-type: none"> • Little impact • Pages are unbalanced 0–1	<ul style="list-style-type: none"> • Small impact • Pages are somewhat balanced 2	<ul style="list-style-type: none"> • Positive impact • Pages are mostly balanced 3	<ul style="list-style-type: none"> • Striking and memorable project • Care with page balance greatly enhances project 4
Neatness (4 marks)			
Messy or sloppy work 0–1	Somewhat neat 2	Neat 3	Very neat 4
Accuracy of information (8 marks)			
Many inaccuracies 0–3	Somewhat accurate 4	Mostly accurate 5–6	Highly accurate 7–8

Evaluation Guidelines	Marks
Part 1: Multiple Choice and Short Answer	/26
Part 2: Design a 3-D Structure	/24
Total Marks	/50

Lesson 1.2A
Warm-up

1. Of the following 3-D shapes—cube, rectangular prism, triangular prism, and cylinder—which have:
 - a. rectangles in the net? _____
 - _____
 - b. triangles as faces? _____
 - c. circles as a surface? _____
 - d. only squares in the net? _____
2. Match each shape to each area. You can use your formula sheet.

- a. 9.1 cm^2
- b. 113 cm^2
- c. 9.6 cm^2
- d. 30 cm^2
- e. 60 cm^2
- f. 28.3 cm^2
- g. 12 cm^2
- h. 24 cm^2

Lesson 1.2B
Warm-up

1. Describe each of the following shapes.

a.

b.

c.

2. Find the missing lengths in each diagram.

a.

BC = _____

CD = _____

DE = _____

b.

AB = _____

AC = _____

CD = _____

Lesson 1.2C
Warm-up

1. Which words and units match? Write the correct letter in each blank.

_____ surface area	a. cm
	b. m^2
_____ volume	c. mm^3
_____ length	

2. Find the volume of each rectangular prism. Include units in your answer.

a.

b.

Section Assignment 1.2 Part 1:
Multiple Choice and Short Answer

1. What is the surface area of this box? (2 marks)

- a. 208 cm^2
 - b. 296 cm^2
 - c. 416 cm^2
 - d. 832 cm^2
2. What is the surface area of this prism? (2 marks)

- a. 74 cm^2
 - b. 1670 cm^2
 - c. 1765 cm^2
 - d. 1840 cm^2
3. The diameter and height of a cylinder are each 2 cm. What is the surface area of the cylinder to the nearest hundredth of a square centimetre? (2 marks)
- a. 15.70 cm^2
 - b. 18.84 cm^2
 - c. 31.40 cm^2
 - d. 37.68 cm^2

4. What is the volume of a cube with an edge length of 2.3 m? (2 marks)

- a. 12.2 m^3
- b. 24.3 m^3
- c. 36.5 m^3
- d. 48.7 m^3

5. What is the volume of this prism? (2 marks)

- a. 4250 cm^3
- b. 5000 cm^3
- c. 8500 cm^3
- d. $10\,000 \text{ cm}^3$

6.

- a. Simply by looking, guess which of the prisms above has the largest volume. Name your choice here: (1 mark)

Explain your choice. (2 marks)

b. Find the volume of each prism. (4 marks)

c. Which one is larger? (1 mark)

Section Assignment 1.2 Part 2: Design a Dog House

You will be designing a dog house for the dog of your choice and figuring out the cost of lumber to make it. (32 marks)

Research the dog of your choice. (4 marks)

Write the type here: _____

Write the overall dimensions of your dog using metres or centimetres.

How long is it? _____

How wide is it? _____

How tall is it? _____

Step 2: Decide on the dimensions of your doghouse. (4 marks)

Remember, your dog needs to be able to fit through the opening and be comfortable inside.

Label the dimensions on this drawing.

Height of Triangular Prism: _____

Height of Rectangular Prism: _____

Width of Rectangular Prism: _____

Width of Opening: _____

Height of Opening: _____

Step 3: Decide if the dog will fit in the doghouse. (4 marks)

- What is the approximate volume of your dog?
- What is the volume of your dog house, to the nearest tenth?

Show your work below, then write your final answer here:

- Will your dog live comfortably in your dog house? Explain why, or why not.

Step 4: Calculate the cost of the plywood. (12 marks)

The plywood you will be using for the outside surfaces of your dog house costs \$3.50/m². This plywood is coated so that it is water resistant to prevent rotting.

- Find the area of each surface to the nearest tenth of a square metre.

front view: _____

back view: _____

side view: _____

top view: _____

bottom view: _____

- What is the total surface area? _____
- The plywood is sold as one complete m². How many full pieces of plywood will you need? _____
- How much will the plywood cost? _____

Step 5: Calculate the cost of the frame. (4 marks)

To hold up the sides of the doghouse you will need to build a frame inside. The drawing in Step 4 shows all the beams you will need to build the frame.

The beams cost \$2.00 for every metre of length.

- a. Using the drawing, figure out how many metres of beam you will need.
Show your work below, then write your answer here:

- b. How much will the beams cost you? _____

Step 6: Calculate the total cost of the project and summarize your learning. (4 marks)

- a. What is the total cost of this project? _____
- b. What did you learn that you did not already know by completing Steps 1–5?

Evaluation Guidelines	Marks
Part 1: Multiple Choice and Short Answer	/18
Part 2: Design a 3-D Structure	/32
Total Marks	/50

Section Assignment 1.3 Part 1:
Multiple Choice and Short Answer

Multiple Choice (2 marks each)

1. Which of the following polygons cannot tessellate an entire plane?
 - a. equilateral triangle
 - b. square
 - c. regular pentagon
 - d. regular hexagon

2. Polygons can tessellate an entire plane when the vertices are joined at a point and they add up to _____°.
 - a. 90°
 - b. 180°
 - c. 270°
 - d. 360°

3. A rhombus has a pattern cut out of one edge. The pattern is lifted out of the rhombus and is slid to the other side without turning or flipping the rhombus. The shape is taped to that edge. Which statement is correct?
 - a. The area of the rhombus = the area of the irregular shape
 - b. The area of the rhombus > the area of the irregular shape
 - c. The area of the rhombus < the area of the irregular shape
 - d. Not enough information is given

Decide what type of transformation(s) you see in each of the following tessellations. Choose from these choices for each tessellation. Each tessellation can have more than one answer.

- a. translation
- b. reflection
- c. rotation
- d. translation, reflection
- e. translation, rotation
- f. all three transformations

4.

5.

Short Answer (3 marks)

1. a. What is the regular polygon shown in this diagram. (1 mark)

- b. Can this shape tessellate an entire plane? Explain your answer by referring to the diagram. (2 marks)

Section Assignment 1.3 Part 2: Tessallations Booklet

You are going to create a tessellation using an irregular shape. Along with your creation, you will include descriptions of the steps you took to create the tessellation. You can create the tessellation by hand, or by using a graphics program. (37 marks)

Your tessellation must include:

- translation
- reflection
- rotation

You can create a design within the tile that uses rotation or reflection if you aren't able to use either of these transformations to make the tessellation.

Project requirements:

- Use two or more colours in your project.
- Use complete sentences, proper grammar and spelling for the descriptions.

Create a four-page booklet with the drawings and step-by-step descriptions together, in the following order:

What to Write: (Use Complete Sentences)	What to Draw:
For all pages: include a descriptive title written in bold.	
Page 1 • the name of the polygon you started with	the polygon
Page 2 • a step-by-step description of how you changed the polygon to create your irregular polygon • an explanation of whether you used a translation, reflection, or rotation to create the tessellation tile	the tessellation tile
Page 3 • an explanation of why you chose those colours or drawings to decorate the tile Remember: you can create a design within the tile that uses rotation or reflection if you aren't able to use either of these transformations to make the tessellation	the tessellation tile with its design
Page 4 • an explanation of how you used rotation, reflection, and translation in your tessellation	your tessellation in full colour

Important: Before you start your project, read through the marking rubric carefully. After completing your project, check it against the marking rubric before you hand it in.

The following rubric will be used to mark your assignment:

Unsatisfactory	Satisfactory	Good	Excellent
Instructions followed (9 marks)			
Many instructions not followed 0–4	Some instructions followed 5–6	Most instructions followed 7–8	All instructions followed 9
Overall impact (3 marks)			
<ul style="list-style-type: none"> • Little impact • Bland looking 0	<ul style="list-style-type: none"> • Small impact 1	<ul style="list-style-type: none"> • Positive impact 2	<ul style="list-style-type: none"> • Striking and memorable project 3
Balance/layout (5 marks)			
<ul style="list-style-type: none"> • Pages are unbalanced • Layout is cluttered or haphazard 0–2	Pages are somewhat balanced and/or layout is inconsistent 3	Balance and positioning of project elements are consistent 4	Balance and positioning of project elements greatly enhance overall layout 5
Neatness (5 marks)			
Messy or sloppy work 0–1	Somewhat neat 2	Neat 3	Very neat 4
Accuracy of information (10 marks)			
<ul style="list-style-type: none"> • Gaps or overlaps in the drawings • Other inaccuracies 0–3	Somewhat accurate 4	Mostly accurate 5–6	Highly accurate 7–8
Grammar and Spelling (5 marks)			
Several spelling or grammar errors 0–2	Some spelling or grammar errors 3	Few spelling or grammar errors 4	No spelling or grammar errors 5
